**BID BULLETIN NO. 1**  
**July 23, 2015**

All prospective bidders are hereby informed of the following clarification for the above-captioned project:

1. The end-user has specified the brand "Detroit" including the model cited to avert technical complications from the utilization of another brand, particularly considering the unit subject of the instant bidding will be paired with, synchronized and operated simultaneously with an existing unit bearing the trade-name specified. This consideration is underscored by the need for immediate utilization and operation of the unit subject of this bidding ( in conjunction with the existing unit) especially with the threat of flooding which may happen anytime during the present rainy season. Thus, while purported or assumed success of synchronization with unit of different brands or trade-name is not discounted, the end-user has deemed it befitting to pair same brands as this will minimize possibility of errors as well as facilitate synchronization and operation of the entire system. This is not yet to mention other obvious and practical advantages of pairing same brands such as but not limited to facility of maintenance including use and stocking of spare parts that would fit or apply to either both paired units, when the need arises.

Finally upon evaluation, the availability of the brand "Detroit" in the market has been noted, hence this competitive bidding.

This Bid Bulletin shall form an integral part of the bid documents for the project.
